

INGREDIENTS

BETA-GLUCAN—a polysaccharide that modulates immunity and protects the body from pathogenic germs, bacteria and viruses and defends skin cells from ultra-violet rays. It nourishes immune cells of the body—leucocytes and macrophages, accelerates their maturation, improves functionality of macrophages, letting them destroy more viruses, bacteria and parasites. It also possesses antibacterial and anti-inflammatory properties and purifies blood.

INULIN—is a natural oligosaccharide and prebiotic. It is the food for “good” bacteria and stimulates their growth in the intestine. Inulin facilitates the assimilation of vitamins and microelements and is recommended as a remedy alleviating the manifestations of the gastrointestinal diseases.

SPIRULINA—seaweed rich in iron, calcium, magnesium, zinc and group B vitamins. It strengthens immunity, enhances liver performance and restores the intestinal microflora.

SELENIUM and **VITAMIN E** regulate redox processes in the body and provide for normal immune system performance.

DiReset

Natural product
to boost the immunity

DiReset INGREDIENTS:

- ✓ Help restart and renew the immune system on all levels
- ✓ Normalize intestinal microflora, thus strengthening the “intestinal immunity”
- ✓ Recognize and destroy mutating cells at the earliest stages
- ✓ Improve digestion
- ✓ Facilitate ultimate assimilation of nutrients, vitamins and minerals

DiReset: My Immunity Is My Castle

DANGEROUS MALFUNCTION

Our immunity is a strong multi-level structure that involves all systems of the body. For excellent immunity, all cells, organs and tissues have to work consistently. This particular internal mechanism is human protection from bacteria and viruses. However, the immunity not only safeguards from the external impact. Correctly aligned, this defence system of the body is able to recognize and destroy all damaged or mutated cells that can provoke many serious ailments.

It is not always, however, that this system operates without a hitch. Bad ecology, wrong habits, frequent stressful situations and unbalanced diet all impose a harmful impact on all systems of our body, and usually the immunity is the first to suffer.

Our immune system is like a well fortified castle which withstands the siege of bacteria and viruses. But if the castle is destroyed from the inside, it becomes impossible to hold the line. The immune system malfunctions and opens the gates of the castle, letting the enemy in. It is particularly common for hematopoietic and digestive systems' disorders, when diseases and stress reduce the number of immune cells in blood and intestine. Besides, many cases of discomfort are accompanied by the intestinal microflora damage, which additionally undermines our immunity.

What should be done, if the immune system stops carrying out its barrier functions? Can we help it restore?

RISE IN DEFENCE!

DiReset natural product helps restart and renew the immune system.

The ingredients of *DiReset* contain unique natural immunomodulators—spirulina and beta-glucan, which are able to boost the performance of the defence system to the full extent.

One capsule of *DiReset* contains almost a daily allowance of selenium* and about half a daily allowance of Vitamin E** that visibly enhance the overall body resistibility acting in synergy.

Unlike most other immune-stimulating products, *DiReset* can be taken continuously irrespective of the time of year. It activates the immunity without any special load on the body and doesn't build up a tolerance.

It is recommended to take *DiReset* after purification of the body from toxins by *Di Guard nano*. With such approach to overall health promotion the immune system will restore with ultimate speed.

* 67% of daily allowance of selenium for men and 91% of daily allowance for women

** 40% of daily allowance of Vitamin E

GOOD TO KNOW

Have you known that...

Beta-glucan is a unique compound that was discovered more than 40 years ago, and is contained in big amounts in oat bran and shiitake mushrooms. Scientists all over the world have studied the properties of **beta-glucan** and concurred that it is one of

the best boosters for the immunity, as it helps nourish the immune cells of the body—macrophages and leucocytes. **Beta-glucan** is no less important in immunology science than penicillin in the world of antibiotics.

Inulin as a medicinal substance was discovered two centuries ago, and since then it has been the most widely used prebiotic in the world. It improves the work of the gastrointestinal tract and metabolism, supports immune cells of the intestine. Most of **inulin** is produced out of chicory.
