

## INGREDIENTS

**BILBERRY EXTRACT** improves eyesight acuity and thus serves to protect the eyes. Bilberry's active ingredients accelerate retinal tissues' regeneration, improve blood circulation and reduce eye fatigue.

**LUTEIN** and **ZEAXANTHIN** with the marigold extract are conspicuous carotenoids that form a so called macular pigment, which serves to protect eye retina from a negative impact of UV-rays and thus guarantees the perfect eyesight.

**L-GLUTATHIONE** is present in the vitamin B2, which is indispensable for normal structure and functioning of the organs of vision. Effective for preventive treatment of cataract.

**VITAMINS C, E, SELENIUM** complement each other's action, uphold cells' structural integrity, serve as biological antioxidants, and protect the crystalline lens.

**B VITAMINS, COPPER, ZINC** and **MANGANESE** are also vital antioxidants that elevate vision acuity and shield eye mucosa from computer radiation and inflammation (conjunctivitis).

**VITAMIN PP** reduces the risk of visual disorders and relieves eye strain.

## NEW PERFECT VISION FORMULA!

A balanced formula,  
enhanced by antioxidants  
and created exclusively for Vision.  
Contains the ultimate set  
of vitamins for eyes.

- Improves vision acuity
- Mitigates the risk of age-related vision problems
- Facilitates eye strain relief resulting from prolonged loads
- Contributes to protection of visual organs from free radical damage

## PROTECTION FROM EYE STRAIN

90% of all information about the surrounding world is perceived through the organs of vision. Consequently, any visual impairment significantly affects the quality of life.

Human visual apparatus is one of the most complex systems of the body and its performance depends on a number of factors. Computer is by all means one of the key causes of visual acuity decrement. Redness, smarting and dryness of the eyes due to deterred blinking, excessive lacrimation... These are consequences of asthenopia (eye strain), a form of so called computer vision syndrome. Prolonged eye strains are often accompanied with frequent headaches and rapid eye fatigability. Insufficient cornea watering often initiates a sandy-gritty sensation, itching and burning in the eyes.

Another cause of the visual deterioration is age-related changes. Actually, it's "old sight" or presbyopia that makes it impossible to distinguish tiny letters from one another, or see small objects from afar.

Also, eye muscles can grow weak because of bad habits, for example, smoking and alcohol consumption. The smoke irritates mucous membranes, damaging the optic nerve and retina, which makes the eyes of a smoker seem sore and bloodshot all the time. Alcohol is a strong neurotoxin that affects brain cortex areas, responsible for human visual perception.

Such aggressive factors as bad habits, computer vision syndrome and age-related changes may provoke visual disorders. However, it is possible to ensure eyesight protection even in the tricky conditions of everyday life. You can preserve acute vision with the help of an innovative natural formula of *Safe-to-see forte*, created exclusively for Vision and containing the best ingredients, beneficial for your eyesight.

## PERFECT VISION FORMULA

Balanced *Safe-to-see forte* formula helps alleviate eye fatigue and mitigate the risk of visual disorders. *Safe-to-see forte* is a comprehensive, ultimately balanced product, combining the best substances, beneficial for your eyesight.

*Safe-to-see forte* contains such powerful antioxidants as zinc, manganese, selenium, as well as B, E and C vitamins, indispensable for proper functioning of the visual organs. Bilberry extract accelerates regeneration of eye retina and enhances the blood supply, which ensures protection of the eyes in terms of protracted eye strain. Marigold extract contains carotenoids—

lutein and zeaxanthin—that shield human organs of vision and neutralize free radical damage. L-glutathione is an antioxidant shield of the crystalline lens whites, which also efficiently prevents age-related changes of the visual apparatus. Copper, zinc and manganese are pronounced antioxidants that protect eye mucosa from computer radiation and excessive eye strain, and preclude visual disorders.

Thanks to the unique combination of *Safe-to-see forte* ingredients, it contributes to mitigating the risk of ocular pathologies, protecting the organs of vision from free radical impact. The product helps shift and postpone age-related changes: weakening and atrophy of eye muscles, myopia and hyperopia.

*Safe-to-see forte* improves eyesight acuity, relieves manifestations of the visual fatigue syndrome, blocks free radical impact and mitigates the risk of visual disorders.

## TARGET AUDIENCE

- Those who want to protect the organs of vision and reduce eye strain
- Those who wish to postpone age-related vision changes
- Computer- and TV-fans.
- In cases of visual impairments of any kind
- Young people/students, who have to read a lot
