

INGREDIENTS

BITTER ORANGE (CITRUS AURANTIUM) extract provides bioflavonoids hesperidin and diosmin, which produce venotonic effect, and strengthen the walls of blood vessels. They decrease extensibility of the veins, improve their tonus, remove venous stasis, reduce capillary permeability and fragility, improve microcirculation and lymph flow, thus removing symptoms of vascular insufficiency.

RINDS OF CITRUS FRUITS extract is also the source of bioflavonoids hesperidin and diosmin, which cope with varicose veins. Effectively improves endurance and workability by easing unpleasant feelings caused by vascular insufficiency: removes edema, heaviness in the legs, itching, convulsions, tired feet syndrome. Adjusts large veins and smaller blood vessels.

GRAPE POMACE EXTRACT contains oligomeric proanthocyanidins, which also strengthen the walls of blood vessels, and powerful flavonoids-antioxidants, which restore capillaries functioning, and help remove edema caused by vascular disorders. Grape pomace extract helps abate ache, convulsions, numbness and tingling, especially in the night-time. Improves blood circulation in veins.

GOTU KOLA EXTRACT improves blood circulation, lowers blood pressure in veins, helps quickly recover the walls of blood vessels, reduces edema. Improves the condition of varicose veins, reduces overall discomfort and tired feet syndrome caused by chronic vascular insufficiency.

PAPAYA EXTRACT, due to a ferment papain, decreases blood viscosity, improves microcirculation, and prevents thrombophlebitis by diffusing thrombocytes and not letting them form blood clots and obstruct blood vessels. Has anti-inflammatory and cardiotonic effect.

Natural product to cope with heaviness in the legs, vascular spider and chronic vascular insufficiency

- ✓ Prevents thrombophlebitis and varicose veins
- ✓ Reduces symptoms of chronic vascular insufficiency
- ✓ Removes edema
- ✓ Lets get rid of heaviness, ache and weakness in the legs
- ✓ Recovers and strengthens the walls of blood vessels
- ✓ Helps get rid of vascular spider
- ✓ Prevents convulsions

*Only the best.
Only from Europe*

“DISEASE OF CIVILIZATION”

Heaviness and weakness in the legs, burning, tingling, convulsions, and edema—is there anybody who has never experienced these indispositions, though temporary as they seem? Yet all the above are not just manifestations of ordinary fatigue but the symptoms of disorder of blood current in veins—chronic vascular insufficiency. The term refers to a number of illnesses. Varicose veins, thrombophlebitis, and vascular anomalies threaten, according to general medical statistics, every third woman and every tenth man. In recent years the disease became so widespread that many experts dub it “the disease of civilization”, and warn that only little number of people will be lucky enough to avoid vascular insufficiency.

This is largely determined by our lifestyle. Sedentary work or, on the contrary, spending much time on feet, frequent flights, lack of exercises, excessive weight, uncomfortable footwear, minor traumas of legs, as well as some congenital specifics of vascular system and hormonal status—all these can, given time, lead to vascular insufficiency. And then your every step will be accompanied by ache in calves, heaviness in the legs, and convulsions.

But it would be a mistake to consider these indispositions as inevitable part of life, and to think that though the disease is incurable, it is not that dangerous. In fact, progressing vein diseases are fraught with serious complications. So, do not waste time and try to cope with the disease while it's not too late. New product of Vision Company—venotonic **VenoStrong**—will help you.

LET YOUR STEP BE LIGHT STEP AGAIN!

The perfect formula of natural venotonic **VenoStrong** has been designed to provide comprehensive effect on venous system. This unique product is able to reduce all unpleasant feelings related to vascular insufficiency. **VenoStrong** will improve blood circulation, reduce edema, and strengthen blood vessels.

To create **VenoStrong**, unique plant components had been selected which already proved to be the most effective natural remedies for vascular insufficiency.

Venotonic **VenoStrong** mostly consists of the extracts of bitter orange (*Citrus aurantium*) and rinds of citrus fruits which are rich with powerful bioflavonoids diosmin and hesperidin. They remove venous stasis, reduce capillary permeability, and strengthen blood vessels. The extracts of grape pomace, gotu kola and papaya strengthen the impact of bioflavonoids, help reduce edema and ache, and lower blood pressure in veins thus letting you get back your light step and forever forget about ache.

VenoStrong handles both causes and manifestations of chronic vascular insufficiency. This venotonic not only will smooth away the symptoms of the disease, but will also prevent serious complications, which vascular insufficiency could cause.

With **VenoStrong** your legs will be relaxed and beautiful. You will enjoy strength and lightness in your legs, and everybody will admire your flying step!

OUR RECOMMENDATIONS

Taking **VenoStrong** would be of great benefit to those who:

- suffer from edema in the legs, feel heaviness and “inflation” in the legs
- have changes in the venous pattern and the appearance of vascular spider
- feel discomfort in the calf muscles, and suffer from night cramps
- are exposed to long static load (have to sit or stand for a long time)
- wear high heels
- are prone to cardiovascular diseases
- to all women, because their hormonal fluctuations provoke development of chronic vascular insufficiency
- people older than 30
- people who lack exercises
- people with excessive weight
- smokers and those who recently quit
